Village Parkway	The village parkway refers to a predominantly, continuous soil planting area within the public right-of-way, typically adjacent to the curb line of a street.
Sidewalk Cut-out	A sidewalk cut-out refers to an opening in a sidewalk completely surrounded by concrete, asphalt, or pavers.
Private Property	Private property includes residential, corporate, parks, golf courses, cemeteries, or any other landscaped planting site not within the public right-of-way.
Under Wires	Smaller trees better suited for planting under utility wires.
Salt Tolerant	Salt tolerant trees are recommended for use in areas which are subject to road salt.
Spring Planting Best	Trees which may require spring planting or at least to be nursery dug in the spring to improve establishment and survivability rates.
Availability	
GD =	Good: commonly available in most nurseries
AV =	Average: available in many nurseries
LTD =	Limited: available in some nurseries in limited quantities
VLTD =	Very Limited: somewhat difficult to find in nurseries
NA =	Not Available: currently no known growers
Hardiness	
EX =	Excellent: good overall survivability
GD =	Good: performs well
AV =	Average: grows within the area
AV-PR=	Average to Poor: may grow within protected sites but otherwise not survive in exposed sites.
Ease of Transplant	
GD =	Good: Easily transplantable
AV =	Average: Transplants reasonably well
DIF=	Difficult: Requires special consideration for successful transplant
Shade	Trees designated as "shade trees" by the Village of South Elgin
